DISCLAIMER: The Land Scout report is intended to provide useful information during the planning stages of projects, environmental due diligence, conservation and mitigation planning. The Land Scout report is not intended to replace consultation with biologists, archaeologists, attorneys, local, state, or federal agencies. In running this report, you understand the intent of this system and do not consider this a replacement for consultations with other sources that would be used on a site specific basis. Restricted cultural resource information is not accessible on Land Scout. Consultation with biologists, archaeologists, title attorneys and other appropriate professionals is recommended prior to starting a project. For more information on leasing, permitting, wildlife and archaeology please contact Reagan Smith Energy Solutions at 405-286-9326 or info@rsenergysolutions.com
